

TikiLIVE Advanced Analytics

It's better than the Nielsen Ratings - it is the actual viewing habits of your customers! Our Advanced Analytics Module is fully integrated into your network to track the number of views, average time per viewer, and bandwidth per user by the event, video or channel. Determine peak viewing days and times with dynamic charts and graphs.

Keeping track of total views can be misleading as a viewer can tune in for a minute or two then move on to other content. This can lead to inflated statistics which do not accurately represent viewership. Through easy to follow line graphs engagement statistics reveal which live broadcasts and videos viewers stay to watch and the percentage of any given show or video that gets watched. Find out what percentage of viewers are watching each live broadcast on your network.

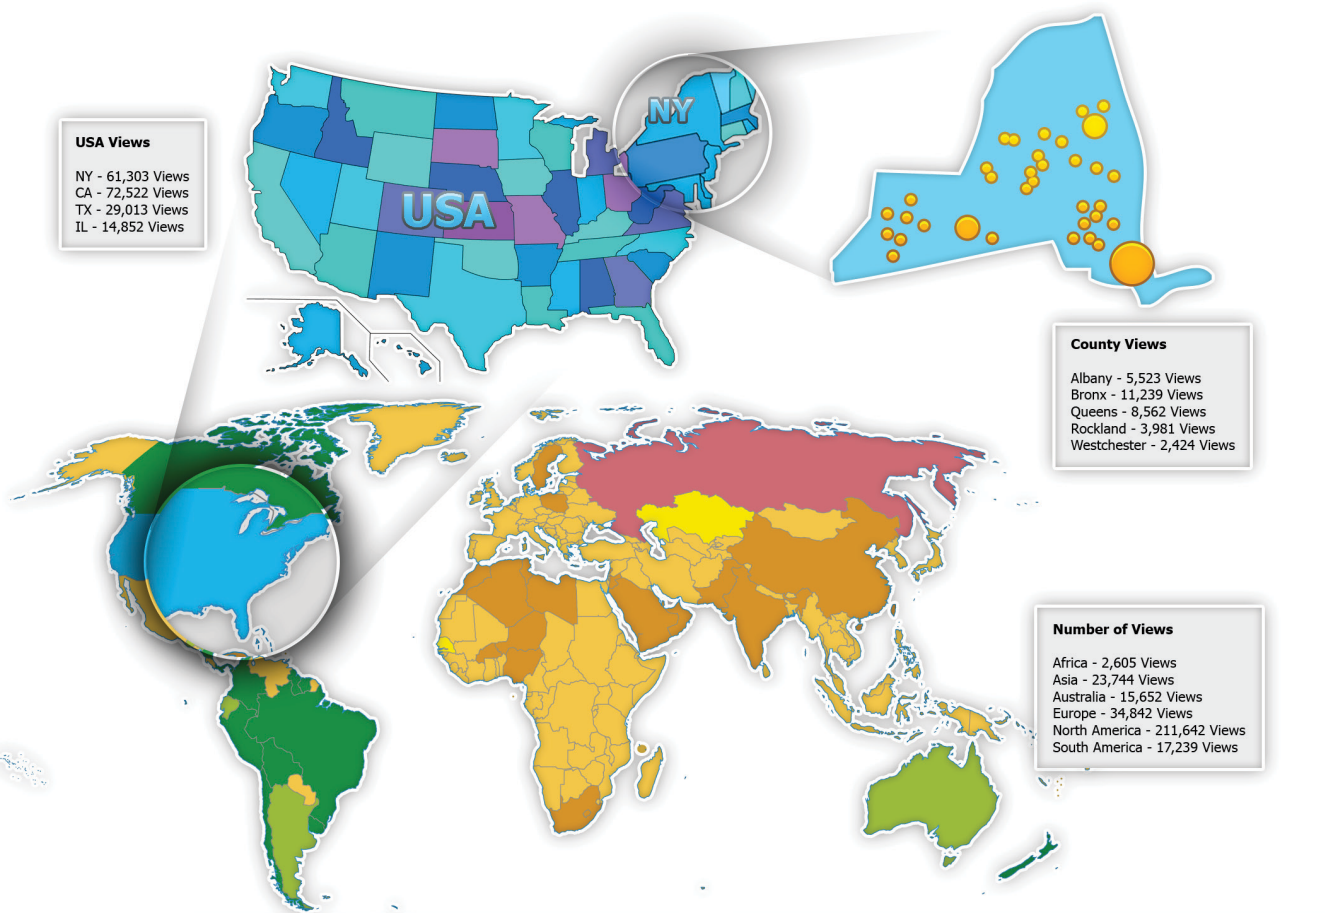

Viewers may come and go during a broadcast as they flip through the channels. Analytics track how much of a show your viewers watch.

This data is then sorted by date and time and through the comprehensive IP mapping it pinpoints every viewer in the world and gives the statistics by continent, country, state, and city. Embedded players get the same treatment and are managed similarly allowing you to pinpoint their viewership anywhere in the world as well.

The shows your users watch are tracked in the viewer logs where a list of all shows watched and bandwidth consumed gives you incredible data for marketing and pricing purposes. This information can be used to tailor your content offering to your viewers' preferences and the commercial ingestion for their buying habits. Never before has a network been able to so accurately cater to a viewers' demands!

Features

- ✓ Accurately track your viewers and their viewing habits
- ✓ Geo-location through IP address allows you to pinpoint your audience
- ✓ Secure data storage for this highly confidential and proprietary information
- ✓ Deep analytics not like the surface style of Google Analytics
- ✓ Incorporate targeted advertising or sell the space for top dollar
